

HOW WELL DO THE COVID-19 VACCINES WORK

1. Which COVID-19 vaccines are being used currently?

In Hawai'i, two highly protective COVID-19 vaccines are being used for community immunization. They are the [PFIZER](#) and [MODERNA](#) vaccine, which are both mRNA vaccines and require TWO DOSES.

There are other vaccines on the horizon for use in the United States, such as the:

- Johnson & Johnson vaccine
- AstraZeneca vaccine

You can find the latest about vaccine development [here](#).

2. How protective are the Pfizer and Moderna COVID-19 vaccines?

94.5 - 95 %
OVERALL PROTECTION

Moderna and Pfizer showed 94.5% and 95% protection against COVID-19, respectively.

100 %
PROTECTION AGAINST
SEVERE DISEASE

The Moderna vaccine showed a 100% protection against severe or fatal disease. See more [here](#).
